

Your Digital Footprint

What is your digital footprint?

Your digital footprint is all the stuff you leave behind as you use the Internet, it your comments on social media, Skype calls, app use and email records- it's part of your online history and can potentially be seen by other people, or tracked in a database.

Everything you post online stays around for a long, long, long, long, long, long time. Before you post anything online THINK - Is it True? Is it Helpful? Is it Inspiring? Is it Necessary? Is it Kind?

Your Digital Footprint

A digital footprint is the trail of information that people leave online or using other communication devices.

- favorite apps
- websites visited
- messages sent
- videos downloaded
- pictures uploaded
- music downloaded
- games played
- comments posted

What will your digital footprint look like?
